

Internet2 Video Services

www.internet2.edu/video

Internet2 offers cloud-based, interoperable video services for the research and education community. From telepresence to videoconferencing to desktop and mobile tools, the Internet2 Video Services provide a comprehensive cloud environment to achieve “better than being there” remote collaboration for your institution or organization.

Become a Participant

By becoming an Internet2 Video Services participant, your institution will open a new door to unparalleled video collaboration. Participants will receive:

- Four-screen interoperable Virtual Room*
- Up to ten direct endpoint registrations
- Unlimited endpoint registrations for members who aggregate endpoints through their own infrastructure

	Member	Non-Member
Annual participation	FREE	\$10,000/year

* These rooms leverage shared resources—access is not guaranteed.

Cisco TelePresence System 3000 in 32-screen Virtual Room

Polycom HDX 8000 connected to Cisco CTS 500

Virtual Meeting Rooms

We recognize that successful collaboration means the ability to bring all the appropriate people into the conversation at once. Our virtual meeting rooms provide full interoperability with all major videoconferencing and telepresence systems.

Schedulable Virtual Rooms

These rooms provide all the capabilities and convenience of Dedicated Virtual Rooms, but are scheduled in advance and billed on an hourly basis.

	Member	Non-Member
Four-screen room/hour	\$180	\$225
Eight-screen room/hour	\$320	\$400
Sixteen-screen room/hour	\$560	\$700
Twenty four-screen room/hour	\$720	\$900
