Mike Tepedino, Johnson & Johnson,
David Balenson, Network Associates, Inc.

21 October 2003
BoF Organization

- Initial Discussion by panelists
  - What are the major discussion points for the BoF
    - Internet2 / Abilene perspective
    - NOC perspective
    - Abilene connector perspective
    - REN-ISAC perspective
    - Corporate perspective
    - Research perspective

- Open discussion on the main issues
Abilene Security Issues

- **Abilene Security**
  - Filtering on backbone – none unless the network itself is under threat
  - Will filter if requested by the connectors

- **Abilene Security Document**

- **Abilene Data and Privacy Concerns**
  - Netflow data has low order 11 bits zeroed before the data hits a disk
  - Should we alter this policy to help identify compromised hosts?
  - Doug Pearson will talk about this more fully.
