

November 1st 2010, Internet2 Fall Member Meeting

Jason Zurawski – Research Liaison

Network Tools Tutorial

Agenda

- Srikanth Sundaresan srikanth@gatech.edu
 - Recent studies in the UK and the USA have shown that there is a wide gap between speeds advertised by ISPs and actual speeds obtained by home network users
 - We analyze the various factors that affect performance seen by home users.
- Christopher Brumgard chris.brumgard@accre.vanderbilt.edu
 - Logistical Networking using the LoDN suite of tools
- Hyojoon Kim joonk@gatech.edu
 - Present initial findings about the configuration tasks that operators perform across the Georgia Tech and Wisconsin campus networks
 - Describe configuration analysis tools
 - Solicit insight and help from other campus network operators regarding common network management and configuration tasks (and their associated complexity).
