Social Identity Working Group

FALL 2012
INTERNET2 MEMBER MEETING

Philadelphia, PA
September 30-October 4

Agenda

- - Welcome - *Steven Carmody and Keith Hazelton*
- - Review [Internet2 Intellectual Property Rights](#)
- - Agenda Bash
- - Status Update with Demo on Test Social2SAML Gateway - *Paul Caskey*
- - Deployment Models
- - Implementation Models
- - Policy around Gateways as SP proxies from PoV of social IdPs
- - Future Work for SocialIdentity
- - Questions / Comments

- Deployment Models

- Federation-level shared service
 - hosted by InCommon Operations, a Participant institution, or a contracted 3rd party
- Institution-level shared service
 - hosted by central IT, a school or college, a department, or a campus-based VO
- Entity-level service
 - hosted per-SP using native SP backdoor or simpleSAMLphp or something else

- Implementation Models

- lightweight, stateless, passthru gateway
 - easiest to support but may have legal implications
- gateway with account linking
 - social identity linked to some Federation identity
- Gateway as a Service
 - each campus manages its own gateway instance "in the cloud"
