

Telepresence @ Internet2

Spring Member Meeting 2009
April 28, 2009

The Internet2 Network

- Internet2 is working with our members to ensure that all telepresence solutions operate on the Internet2 Network

Cisco TelePresence

- Internet2 members have requested that Internet2 work with Cisco to enable the use of Cisco TelePresence across the Internet2 Network
- Internet2 is working with Cisco to understand deployment options for Cisco TelePresence with a focus on usability, scalability, reliability and interoperability

- Working with Cisco, the Quilt, and other members to ensure that a deployment of Cisco TelePresence on the Internet2 Network is capable of interoperating with other R&E networks and commercial Cisco TelePresence service provider networks.
- We agree there should be a comprehensive international R&E dialing plan and reachability among R&E TelePresence units.

Coming up

- First demonstration of Cisco TelePresence running across the Internet2 Network during the Wednesday General Session
- Gathering of members interested in Cisco TelePresence
Wednesday @ 2:00PM in Madison room

- The Internet2 Network can support all telepresence solutions
- Packaging network performance tools to meet the requirements of telepresence
- Encourage the implementation of open standards and interoperable products

Thank You
